BEN VENUE LABORATORIES, Inc.  
270 Northfield Road  
Bedford, OH 44146

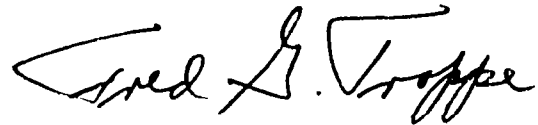

---

On behalf of our client, Ben Venue Laboratories, Inc., we have examined their facility location for the potential of contaminated run-off, have prepared the enclosed application and attest to the contents therein. This facility does not store chemicals outside; as well, none of the unit operations inside the plant buildings presents any potential for contaminated run-off.

Any stormwater run-off from the above location enters a storm ditch on the west (or backside) of the plant property flowing north to Tinkers Creek.

We trust that this application and the enclosed fee, i.e. \$15, satisfy the NPDES Requirements as promulgated in the Federal Register of 9/26/84.

Very truly yours,

Fred G. Troppe
